

Extended Warranty for Industrial Machinery Damage and Breakdown

from

your company name here

Enjoy the peace of mind of maximum uptime from your industrial machinery by protecting your business with extended warranty for industrial machinery damage and breakdown.

- No more unpleasant repair bills needing immediate payment
- Predictable monthly fee covering both breakdown and damage
- Engineer response within 24 hours for significant breakdowns
- Guaranteed repairs from qualified engineers
- Coverage for existing assets as well as new purchases*
- Managed in partnership with market leading CNC Asset Management

Reducing your breakdown risk needn't be expensive

Just look at our priced examples below and see the value for money that we can offer.

Example Equipment	Age	Warranty Value	Length of Warranty	Monthly Warranty Premium**
 Machine 1	4 years	£22K	up to 60 months	£58.99
 Machine 2	4 years	£16K	up to 60 months	£42.91
 Machine 3	4 years	£68K	up to 60 months	£182.36
 Machine 4	new	£35K	up to 60 months	£48.82

**Just one major breakdown could cost you more than the extended warranty!
It makes good sense to protect yourself... today**

*contact us for details.

**example premiums assume a £0 excess, however a £250 excess option is available which will reduce the premium amount.

Types of assets available for cover

The Extended Warranty for Industrial Machinery Damage and Breakdown is available for a very wide range of industrial assets, both existing and newly acquired. Below are just a few examples. If you don't see what you're interested in then call us and we'll let you know.

Machine Tools

- Metal forming
- Metal cutting
- EDM
- Plastic injection moulding
- Plastic extrusion
- Routers

Printing Equipment

- Wide format printers
- Presses (normally up to 6 colour and a gluer)
- Guillotines
- Shakers

Other Equipment

- Plasma screens
- Materials Handling Equipment
- Hydraulic motors
- Power Transmission Output attachments
- Engines, equipment and associated machinery

Your own lists here

What the cover includes

Damage caused by operator error

If your machinery breaks due to the operator's error, the warranty will pay for the work to repair the machine. Examples are spindles crashing, damaged guide rails.

Damage caused by paper pile up damage

If your machinery breaks due to paper piling up and damaging the equipment, the warranty will pay to repair the machine. Examples are printer heads or cam rollers being broken by paper pile up.

Breakdown caused by electrical or mechanical failure

If your machinery breaks due to electrical or mechanical breakdown, the warranty will pay for the repair to the machine. Examples are breakdown of bearings, failure of PCBs and electric motors.

Length of warranty

Up to 60 months for machine tools, presses and finishing equipment.

Limit of protection

We will pay up to the amount declared in the warranty schedule. For new machines this is the invoice value, for used machines or warranty renewals this is the market value at the time. The value always includes any additional items which form an integral part of the machine, such as gantries and bar feeders.

There is no limit to the number of payments that can be made save that the total amount that can be recovered under the warranty cannot exceed the value of the machinery in the warranty schedule.

What the warranty pays for

If your machine breaks down, we pay for the costs to put it back in working order. This means the costs of labour, parts and reasonable costs of travel, including any overnight stay required. We pay for the expediting costs to ship parts from overseas if this is the only way to repair your machine. We pay for the costs of dismantling and re-erection less the value of any salvage parts. We may decide to repair damaged parts rather than replace them.

In the event of a total loss

If the machinery was new when the warranty began, in the event of a total loss, we pay the new replacement value of the machine including the cost of dismantling less the value of salvaged parts. If the machinery was not new when the warranty began, in the event of a total loss, we pay the market value at the time of the loss and the cost of dismantling less the value of salvaged parts.

For breakdowns that can't be repaired quickly

If your machine breaks and cannot be repaired within 48 hours, the

warranty will pay for hiring an alternative machine or any additional expenditure suffered to mitigate any reduction of revenue or income, subject to various limitations. If your machine is not repaired within 14 days of the break, the warranty will pay for your periodic finance repayments subject to various limitations.

No bills to pay

The warranty is often available without an excess in which case there are no bills to pay. When an excess is included the normal level is £250.

What is not included?

- Any electrical or mechanical breakdowns:
 - during the manufacturer's warranty period.
- Any damage not caused by operator error or paper pile up damage, such as fire, theft and collision from a third party.
- No consumable items are covered.
- Any lasers, LEDs or other light sources outside their deemed useful life.
- Any damage you cause to the machine by continuing to use it when it is broken.
- Any damage or breakdown caused by a poor working environment.
- Failure of the public electricity supply and from surges and variations in the electrical supply.
- Electrical and mechanical breakdowns if your equipment has not been regularly serviced or maintained.

This is just a summary of exclusions, contact us for full details

Payment Plan

Payment may be in full or spread over the life of the warranty by using a payment plan. This plan is at 0% interest for up to five years and is subject to status.
